AxTraxPro™ Integration for Schindler CoLab Port Gateway

AxTraxPro™

Centralized access & destination elevator control for enhanced security

Rosslare AxTraxPro™ delivers an end-to-end access control solutions with powerful integration capabilities, now extended to Schindler CoLab Port Gateway Destination Control. This integration enables seamless access and destination control from the AxTraxPro platform, enhancing operational efficiency and security within multistory buildings.

Key features and benefits

Access and Destination Control interface

Integrated Destination Control directs authorized users to designated floors, optimizing elevator usage and reducing wait times.

People Flow Behavior Insights

AxTraxPro provide analytics on how people move throughout the building, enabling smarter access management, better floor traffic flow, and enhanced security.

Advanced Access Control

Set user access permissions for specific speed gates, zones, floors, priorities, doors utilizing access rights, allowing only authorized personnel to reach designated levels and locations across the premise.

Real-Time Synchronization

Instant updates across systems ensure that any changes in AxTraxPro user access permissions are reflected immediately in Schindler CoLab Port Gateway.

Compatible hardware and software products

Rosslare AxTraxPro integrates seamlessly with the Schindler CoLab Port Gateway, delivering advanced solutions supported by Rosslare's extensive hardware portfolio.

AxTraxPro Management Software

The AC-825IP
Networked Control Panels & Expansions

Essential components for the integration

- Schindler CoLab Port Gateway version 1.12.x
- Rosslare AxTraxPro version 28.0.5.4 or higher
- Rosslare AxTraxPro Schindler annual integration license
