

Security at your fingertips

AY-B9250BT | Bio9000 Series

**Professional Fingerprint Biometric Terminal
with MIFARE RFID, Rosslare BLE-ID, Camera & LCD**

The **Bio9000 series**, Rosslare's high-end biometric terminals, providing first-in-class essential features and peace of mind to end-users including face recognition technology, fingerprint liveness check, high-speed optical fingerprint sensor, and encrypted data storage. This series can be seamlessly integrated with Rosslare AxTrxaNG software platform as well as with Rosslare's Bio9000 management software.

Meet Rosslare's **AY-B9250BT**, a Bio9000 series terminal, is our 10,000-user model offering high-performance and high-capacity of 20,000 fingerprint templates. With an interface that includes 4 touch keys, a full color LCD screen, a pinhole camera, and memory for recording photo snapshots based on terminal activity, the AY-B9250BT meets almost any project requirements and architecture challenges.

Whether upgrading a multidoor installation, installing new demanding projects, or protecting a single restricted access door for security sensitive spaces, our AY-B9250BT is the product for you.

Key Features

- Built-in 13.56 MHz MIFARE RFID card reader
- Built-in TCP/IP, RS-485 and Wiegand 26-/34-bit output connectivity
- Built-in tamper and buzzer, output relay for controlling a local device
- High performance CPU and memory for high-speed validation
- Non-volatile event log of up to 100,000 entries
- Wide thermal operating range (-20°C to 60°C)
