

# Gate Automation & Access Control

## To enter with safety

When it comes to gate automation and providing access to your facility via an access point, we provide access control solutions that you can trust. Whether securing your customer's warehouse, residential, commercial property or your parking areas, our solutions are affordable, scalable, easy to use and install, while keeping your premise safe and secure.

From a single access point to extremely complex systems, our experience and variety of products allow you to offer your customer an effective and efficient way to set their access control policy for gates.

## Hands Free and Automatic Gate Control & Operation

For hands free and automatic gate control and operation, our innovative long-range UHF readers are: AY-U920BT that reads various UHF tags from a distance of up to 12 m (39 ft) vs. AY-U915BT that reads from a distance of up to 6 m (19 ft). These readers are also empowered by BLE technology and mobile apps enabling easy access to vehicles and pedestrians without UHF tags or when a dual factor authentication is required.

## Remote Gate Operation

For remote gate operation we offer AY-L23, a long-range RF receiver combined with SA-23-B2 and SA-23-B4 remote controls that operates from distance of up to 70m (230 ft). This device also operates as a stand-alone controller that opens the gate without additional software.

## License Plate Recognition (LPR)

For vehicles, we offer a LPR solution that is an integrated part of our software suite allowing you easy and intuitive management of your access point, while any vehicle will be automatically recognized and authorized to access the facility.

## Access Control Software – AxTraxNG

With our advanced AxtraNG software platform you will be able to define a complete set of rules for gate's operation including operation time, control, schedulers and much more. This will allow you to fully manage any access point, supervise vehicles and pedestrians' entries to enhance site's security.

Access Control

Car Rental

Parking Management

Residential Buildings

Fleet Management

Securing your customer's warehouse, commercial property, and parking areas does not have to be difficult or complicated.
