

Access Control Leader Built On Decades Of Trust

A Legacy Of Innovations

For over four decades, Rosslare has been delivering state of the art electronics achieving R&D breakthroughs such as the first digital battery analyzer in the 80's, all weather anti vandal RFID readers in the 90's – leading to major OEM success in the 2000's.

Broad Portfolio Of Physical Access Control Solutions

Today, Rosslare boasts an extensive product portfolio featuring powerful software, intelligent controllers, readers, biometrics terminals, mobile and RFID credentials and accessories to provide complete solutions for entities of all sizes. Combined with our tailored solutions, we play a key role in our partners' growth to success.

Extensive global network

Global network of Distributors and leading OEMs in over 120 countries, supported by unmatched services and technical support teams.

Vertical manufacturing

Fully automated 10,000 sq meters manufacturing, assembly and testing facility accredited by TUV Rhineland to comply with ISO Quality standards.

Top industry talent

Security division built on a professional management team with expert multidisciplinary skills delivering competitive products that win bids.

Conforming to global standards

Compliance to international standards in Safety, Environmental, Electromagnetic and Radio domains, including EU and US product certifications and RoHS.

One Unified Environment Addressing Any Access Control Need

Featuring easy integration with existing onsite software, hardware and third-party applications – creating a unified access control & management platform – to address the different industry needs in Education, Healthcare, Residential & Commercial Real Estate, Corporate, Finance and more.

Building The Future Of Access Together

Over the coming decade, Rosslare will continue its path to innovation, bringing technological breakthroughs and a new generation of products that will reduce risk while instilling trust and security in our clients.
