GC-01 Hand-Held Reader and **GC-03** Charging Base

GC-01 Hand-Held Reader and **GA-06** Leather Belt Holster

GC-02 Charging Station with Tag Enrollment and RS-232 Data Port

■ Solution Highlights

- Manage multiple guards and multiple event wallets to make sure that patrols are done on time to maintain security and service quality.
- Easy-to-install, software for Microsoft Windows operating systems. Enroll readers, location tags, event wallet and user tags to the system with descriptions in a simple UI.
- Set up patrol routes and print tour instructions for the users. Guards will follow instructions and register arriving at locations and events.
- At the end of shift the tour data is downloaded to the software.
- Software generates reports of location-based events and on the timeliness of the guard to fulfill the guard tour or user's service duty.

■ What is so special about DigiTool?
