

AxTraxPro™ Integration with Hikvision's MinMoe Face Recognition Terminals

Rosslare's AxTraxPro™ access control management software is now integrated with Hikvision's MinMoe face recognition devices. Thanks to the seamless integration, AxTraxPro™ customers can benefit from the entire feature set of Hikvision devices, including face and fingerprint enrollment and management, device activation, people management, event & alarm receiving, mask & helmet & temperature detection configuration, and firmware upgrading.

★★☆ SOLUTION PARTNER

Integration key benefits

- + Enable Biometrics**
Secures your premises with biometric credentials using facial imaging and fingerprint scanning.
- + Single User, Device, and Enrollment Management System**
Managed and controlled within the AxTraxPro™ and provides an "all-in-one" system with a single interface.
- + Ease of Installation**
Installation is faster and easier, requires less investment, and covers a variety of local requirements.
- + Scalability**
Connect and manage up to 2000 biometric devices.
- + Flexible Integration**
Integrates seamlessly with the Hikvision MinMoe™ biometric access terminals and is easily installed on new and existing AxTraxPro™ systems.

Compatible hardware and software products

The Hikvision face and fingerprint terminals are connected to any of Rosslare's control panels. The AxTraxPro™ management software controls Rosslare's products and Hikvision's terminals.
