

## AxTraxPro™ Integration for KONE Office Flow

### Centralized access & destination elevator control for enhanced security

KONE Destination

Rosslare AxTraxPro™ delivers an end-to-end access control solutions with powerful integration capabilities, now extended to KONE Office Flow Elevator Destination Control. This integration enables seamless access and destination control from the AxTraxPro™ platform, enhancing operational efficiency and security within multistory buildings.

## Key features and benefits

### + Access and Destination Control interface

Integrated Destination Control directs authorized users to designated floors, optimizing elevator usage and reducing wait times.

### + People Flow Behavior Insights

AxTraxPro™ provide analytics on how people move throughout the building, enabling smarter access management, better floor traffic flow, and enhanced security.

### + Advanced Access Control

Set user access permissions for specific floors, priorities, doors utilizing access rights, allowing only authorized personnel to reach designated levels and locations across the premise.

### + Real-Time Synchronization

Instant updates across systems ensure that any changes in AxTraxPro™ user access permissions are reflected immediately in KONE Elevator Control.

## Compatible hardware and software products

Rosslare AxTraxPro™ integrates seamlessly with the KONE Connectivity Suite or the KONE Office Flow, delivering advanced solutions supported by Rosslare's extensive hardware portfolio.
