ROSSLARE

AxTraxPro™ Security: End-to-End solution

With the AxTraxPro™, communication and data are secured from the credential all the way to the server using advanced encryption algorithms.

Using **MIFARE**® **DESFire**® technology for your credentials and readers protects you against hacking or copying.

Data transfer between readers and controllers using the **OSDP** Secure Channel Protocol assures highly secured bi-directional communications.

An **AES 256-bit** encryption communication between the AxTraxPro™ server and the controller guards against hackers accessing sensitive data.

A **secure SQL** database communication (TLS 1.2) guarantees that the data is transferred safely over a network on the server side.

Partner Spotlight - SIPL

With close to a decade of partnership with Rosslare, <u>SIPL</u> has executed multiple access control and elevator access projects with Rosslare's top-of-the-field controllers and readers, offering complete security solutions to their customers.

In order to offer quality access control systems to their select customers, SIPL turns to Rosslare and consults their professional partners to cater security solutions tailored to each client's needs.

Hand in hand with Rosslare, SIPL has serviced premium customers such RBI (Reserve Bank of India), and, most recently, their latest project: GRSE. The project was complex, required complete integration work, and in its initial phase, was very challenging. Thanks to SIPL's close connection to Rosslare's team of experts, they successfully completed the implementation.

Access Control Topo Map

Lee Odess is a global authority on access control, a thought leader, a consultant, a speaker, and an author. He has spent his career reimagining the role of access technology in modern connected living environments.

Every month, Lee publishes an updated TOPO map with six categories for the Access Control and Smart Lock industries.

<u>Check the most current map</u>; we are in the first category, READERS / CONTROLLERS / CREDENTIALS.

Upcoming Webinar

The support and education we provide on our products and software are part of our commitment to ensuring your organization's security.

Please join us for our online webinar hosted by Giora Ben Noach, our pre-sale manager. The webinars will be held in English.

This month's events will focus on the newly released management software, <u>AxTraxPro™</u> as well as the Multi-Smart Reader™ - <u>AY-K35</u>.
