

AxTraxPro™ meets MinMoe for advanced security

Rosslare's **AxTraxPro™** Meets Hikvision's MinMoe Face Recognition Devices. Following the most recent release of Rosslare AxTraxPro™, this cutting-edge solution continues to improve with its exceptional performance, scalability, and seamless integration capabilities with third-party systems. We are thrilled to announce the new and seamless integration of Rosslare's AxTraxPro™ access control management software with Hikvision's MinMoe face recognition devices.

With this integration, AxTraxPro™ users use the full potential of Hikvision devices, gaining access to a comprehensive feature set that includes face and fingerprint enrollment and management, device activation, people management, events and alarms reception, mask, helmet, and temperature detection configuration, as well as firmware upgrading.

Rosslare's DigiTool® Guard Patrol Solution

Guard patrol system plays a crucial role in maintaining a secure environment and protecting assets.

Widely used in diverse settings, including commercial buildings, residential complexes, industrial facilities, and public spaces, this system is instrumental in providing the necessary level of security and safety.

Rosslare's legacy Guard Patrol Solution, DigiTool®, covers every part of your premises with well-planned tours for thorough monitoring. Simple and robust checkpoints, equipped with ID tags, along with extremely durable handheld data acquisition readers, empower the system to maintain precise records of security guard presence. This enhances accountability and provides a clear audit trail of patrol activities. Detailed reports allow for improved supervision and control.

Contact us today to fortify your security strategy with Rosslare Guard Patrol Solutions.

Rosslare is training SYSCOM, Mexico City

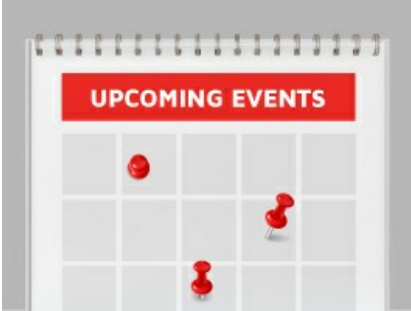

Thank you and delighted to have courses with full participation again, especially to all those who joined us at our recent event in Mexico City, organized with our partner **SYSCOM** on November 15 and 16, 2023. During this event, we successfully completed both our advanced certification programs for AxTraxPro.

Participants delved into the correct installation and configuration of Rosslare access control panels, acquiring the skills to program professionally and recommend this solution to clients upon completion of certification. We appreciate your participation and look forward to continued collaboration to improve the access control solutions experience.
