## AY-K35 Multi-Smart™ Reader - The Solution You've Been Waiting For!

### Simplify Security and Access Management with this Innovative Reader

The AY-K35 Multi-Smart™ Reader brings together multi-technology and OSDP V2 secure channel protocol, redefining physical access control. Its key features prioritize security, and convenience.

#### Multi-Technology

With support of NFC and BLE mobile credentials, 125 kHz FSK and ASK, 13.56 MHz, and MIFARE Classic® Sector reading, the AY-K35 offers a seamless transition to advanced security without the need to replace existing wiring or access control panels.

#### Future-Proof

The AY-K35 is designed for adaptability, ensuring it meets your evolving requirements. Its support of Bluetooth® and NFC mobile identity provides easy integration for the future.

#### Robust Build

Designed for resilience and installation in any environment, indoor or outdoor, the reader is dust and water-resistant. Its robust construction, along with antimicrobial properties, ensures a cleaner and safer environment for all.

#### Simple Migration

The ability to read a wide variety of RFID technologies and standards makes it a Transition Reader. With support of OSDP V2 secure channel protocol, migration from Wiegand to OSDP is effortless.

#### MicroFree™ Antimicrobial Protection

Advanced protection with up to 99.9% effectiveness against a wide range of bacteria. MicroFree™ minimizes microbial presence, reducing pathogen transfer on surfaces and among individuals. This innovation sustains cleanliness by inhibiting bacterial growth, combating mold and mildew. Approved by EPA and BPR, MicroFree™ is safe for application in various environments.

Whether you're an installer, integrator, architect, or security consultant, the AY-K35 empowers you to take control of access management:

#### Seamless Set-Up

The user-friendly mobile admin app ensures quick deployment and management, allowing you to configure settings from the palm of your hand.

#### Improved Security

Dual-factor authentication, MicroFree™ Antimicrobial Technology, and remote enrolment through smartphones strengthen security, ensuring safe, convenient, and hygienic conditions.

#### Universal Compatibility

The AY-K35's universal standards and protocols ensure seamless integration with existing systems and eliminate the need for extensive rewiring.

#### Ideal for Every Scenario

From residential buildings and hospitals to offices, smart cities, universities, and more, the AY-K35 caters to a wide range of applications. Its sleek design and robust features make it a perfect fit for any use case.
