

AY-K35-S Multi-Smart™ Secure Reader

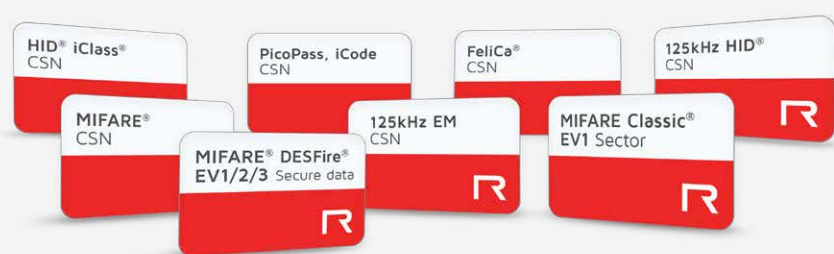

The future-proof reader that packs it all in

The AY-K35-S multi-technology secure reader is compatible with all access control systems, offering organizations the flexibility and scalability they need to adapt to today's ever-changing environment.

Versatile credential technologies

Supports different types of credentials, including 125 kHz (ASK+FSK), wide range of 13.56 MHz standards with MIFARE® DESFire® EV1/2/3, MIFARE® Classic EV1 Sector Read, Bluetooth® and NFC.

Complete ecosystem

Makes DESFire configuration a simple process. Combination of the KeyCard Studio PC tool and the CP-R27 USB card programmer allows unlimited customization of secure credentials and effortless export of configuration preset of reader.

Stylish look

Sleek, modern mini-mullion design with a stylish appearance to fit most surroundings.

Advanced secure access technology

Supports NXP key diversification, proximity check, random ID, OSDP V2 secure channel and more, provides a bullet proof secure solution.

Friendly installer mobile app

Fully manageable and configurable through a smartphone using Rosslare friendly BLE-Admin™ app.

Complete mobile credentials solutions

Combines with Rosslare BLE-ID™ app, as well as an SDK that leverages users' smartphones as credentials.

Environmental features

Water and dust resistant IP68 rating with vandal-proof IK09 rating. Enhanced with 99.8% antimicrobial protection.
